VIABAHN® ENDOPROSTHESIS

HEPARIN BIOACTIVE SURFACE

PERFORMANCE through innovation

Consult Instructions for Use

GORE® VIABAHN® Endoprosthesis in AV Access

1 Flexible

Flexibility that expands treatment options to cover the most demanding anatomy.

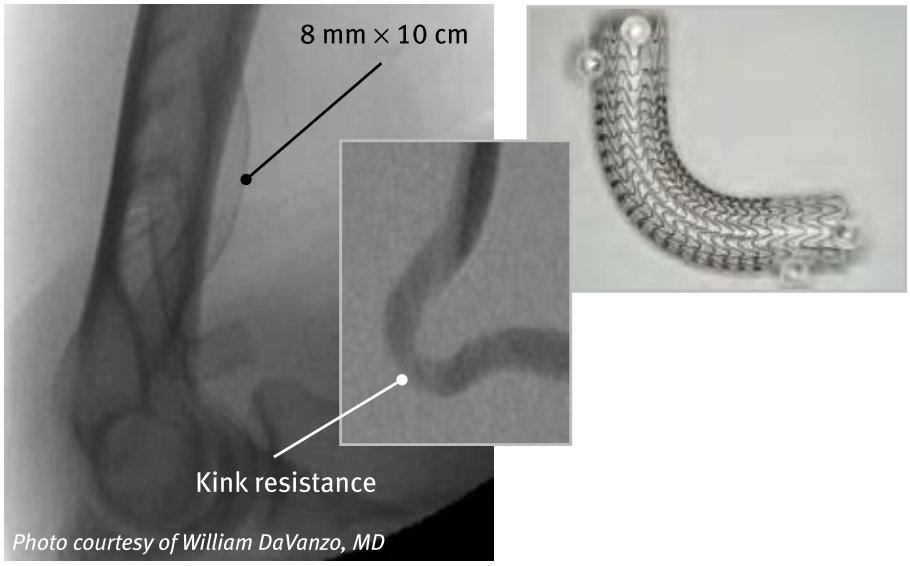
- Conform to the anatomy of a moving arm
- Cross the elbow and flex angles > 90˚

2 Durable

Durability that allows you to cover every curve.

- Utilize a kink-resistant design
- Apply trusted, proven materials
- No reported fractures crossing the elbow (Gore REVISE Clinical Study)

GORE® VIABAHN® Endoprosthesis



3 Proven

Proven clinical outcomes in the **only** stent-graft randomized, controlled study to investigate both stenotic and thrombotic occlusive AV Access patients (Gore REVISE Clinical Study).

- Re-establish flow to occluded grafts
- Increase patient's time to next intervention, safely

Gore REVISE Clinical Study Outcomes

Safe: GORE® VIABAHN® Endoprosthesis study group demonstrated non-inferiority in terms of freedom from major device, treatment, or procedure related adverse events as compared to the PTA group. ($p < 0.001$)

Effective: GORE® VIABAHN® Endoprosthesis study group demonstrated superiority in terms of target lesion primary patency as compared to the PTA group. ($p = 0.008$)
